

Deepjyoti Dey

Kolkata, India — deepjyotidey1307@gmail.com — +91 9163681186 — LinkedIn — GitHub

Professional Summary

Full-Stack Software Developer and Computer Science undergraduate with hands-on experience shipping client-facing features, integrating third-party systems (payment gateways, CRM APIs), and deploying cloud-based services on Azure. Comfortable moving across the stack (React, Next.js, Flutter, Flask, Node.js) and translating ambiguous, real-world business workflows into working software. Experience owning features end-to-end in a fast-paced SaaS engineering internship, from architecture decisions to production deployment.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C, Dart, HTML5, CSS, SQL

Cloud & Deployment: Microsoft Azure, Azure Functions (serverless), Firebase, Supabase, Cloud Deployment, CI/CD

APIs & System Integration: REST API Design, Third-Party Integrations (Razorpay, Cashfree, HubSpot CRM), Webhooks, OAuth, JWT Authentication, RAG, Large Language Models

Frontend & Backend: React, Next.js, Flutter, Node.js, Express.js, FastAPI, Flask, Tailwind CSS

Databases: MongoDB, PostgreSQL, Firebase, Supabase

Practices: Agile/Scrum, Git/GitHub, System Design, Unit Testing, Figma

Experience

Software Development Intern

May 2026 – Jul 2026

GoAvo AI

Remote

- Re-architected an ML inference pipeline, migrating turnout prediction models from Azure ML Studio VM compute to serverless Azure Function Apps with in-process inference and blob artifact loading – cutting infra overhead and deployment time; integrated the Flask REST API layer with the new v1/v2 Function App routes.
- Diagnosed and resolved a real-world performance bottleneck in RSVP search by implementing a 3-character query threshold and 300ms debounce with matching API guards across the Next.js frontend and Flask backend, cutting unnecessary API calls and improving lookup latency.
- Designed and built a four-tier SaaS pricing and entitlement system (Free, Pro, Growth, Enterprise) spanning Pay-per-Event, Monthly, and Yearly billing, backed by a canonical MongoDB `billing_records` ledger and integrated end-to-end with the Razorpay and Cashfree payment gateway APIs.

Projects

CRMS – Enterprise Customer Records Management System

Live Demo

Next.js 15, TypeScript, Node.js, Express, PostgreSQL, Prisma ORM, JWT, Cloudinary

Aug 2026

- Built a role-based enterprise platform (Admin, Authoriser, Staff, Accounts) with a multi-stage KYC approval workflow, configurable SLA timers, drag-and-drop stage management, and a normalised PostgreSQL schema via Prisma ORM; deployed on Render with automatic migrations.
- Secured with JWT access/refresh rotation, bcrypt, per-role route guards, rate limiting, and an append-only audit log; implemented Cloudinary document versioning with security scanning, PDF/CSV reports, full-text search, and real-time notifications.

Eventic – Full-Stack Event Management Platform

Live Demo

Next.js, MongoDB, Clerk, HubSpot API

Apr 2026

Built a full-stack event management platform with Clerk-based auth, MongoDB-backed RSVP workflows, public event pages, automated email notifications, and CRM synchronization via the HubSpot API.

Murder Mystery – Full-Stack Game Platform

Live Demo

Next.js, FastAPI, MongoDB, Clerk

May 2026

Built a full-stack platform with secure batch-gated access, timed quizzes, hint tracking, a scoring engine with leaderboard, and a complete admin dashboard.

Education

RCC Institute of Information Technology, Kolkata, India

Aug 2023 – Aug 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.81

Ramakrishna Mission Boys' Home High School, Rahara

Jun 2020 – Jun 2022

Higher Secondary Education

Percentage: 93.87%

Leadership & Activities

PR and Management Lead, GDG on Campus RCCIT

Sep 2025 – Present

PR and Management Lead, ACM Student Chapter RCCIT

Jan 2026 – Present
